#### Question 1

| ٧ | Which statement puts the blood vessels into <b>increasing</b> order of lumen diameter (interior diameter)? |
|---|--|
|   | A. capillary → artery → arteriole → aorta  |
|   | B. arteriole → artery → capillary → aorta  |
|   | C. aorta → artery → arteriole → capillary  |
|   | D. capillary → arteriole → artery → aorta  |

[1 mark]

### Question 2

Which are chambers of the heart?

I. Atrium

II. Aorta

III. Ventricle

IV. Lumen

A. I and III

B. I, II and III

C. III and IV

D. I and II

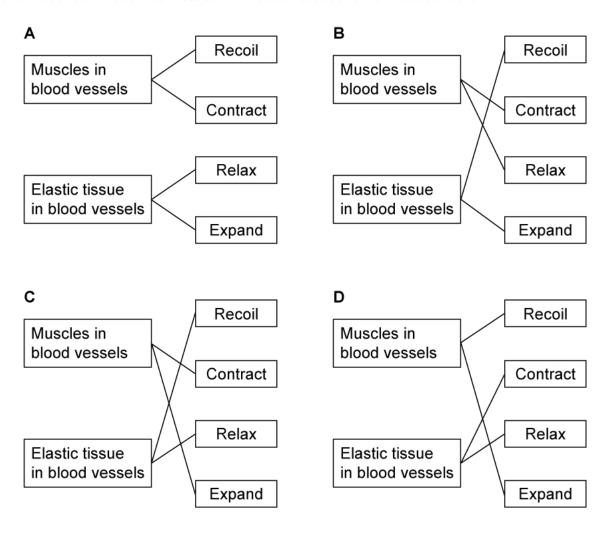

[1 mark]

#### Question 3

Which shows the correct links between tissues within blood vessels and their modes of action?

[1 mark]

#### Question 4

Which statement about the human circulatory system is FALSE?

- A. The double circulatory system is a closed loop.
- B. In the double circulatory system, blood passes through the heart twice on each full circuit of the body.
- C. Blood bathes the cells in each organ that it is supplied to.
- D. The systemic circulation loop supplies blood to all the major body organs including the brain.

#### Question 5

Which describes the sequence of chambers and vessels through which blood flows after it has left the vena cava, on its way to the lungs?

- A. right atrium  $\rightarrow$  right ventricle  $\rightarrow$  pulmonary artery  $\rightarrow$  lungs
- B. left atrium  $\rightarrow$  left ventricle  $\rightarrow$  pulmonary artery  $\rightarrow$  lungs
- C. right atrium  $\rightarrow$  right ventricle  $\rightarrow$  aorta  $\rightarrow$  lungs
- D. left atrium → left ventricle → pulmonary vein → lungs

[1 mark]
